- Ground up construction
- Tenant upfit construction
- Major remodel programs and branding roll outs

Since 2001 B&L construction has proudly served many customers delivering high-quality projects. In 2013 we focused our efforts towards commercial construction primarily in the multi-unit restaurant industry. Since that time we have been considered a top-performing contractor for many of our clients. Restaurant construction currently accounts for over 90% of our business. The secret of our success is simple; we listen to our customers to understand what is important to them and what they hope to achieve with each project. We selectively assign a project manager to each account to offer a single source point of contact. Our team works passionately to provide each customer with an experience that meets and exceeds their expectations.

We currently service all areas in the States of Maryland, Virginia, North Carolina, South Carolina and the District of Columbia

We appreciate your interest and look forward to working with you on your next project. Give us a shot.

You will not be disappointed...

We guarantee it!
